## General Marking Guidance

- All candidates must receive the same treatment. Examiners must mark the first candidate in exactly the same way as they mark the last.
- Mark schemes should be applied positively. Candidates must be rewarded for what they have shown they can do rather than penalised for omissions.
- Examiners should mark according to the mark scheme not according to their perception of where the grade boundaries may lie.
- There is no ceiling on achievement. All marks on the mark scheme should be used appropriately.
- All the marks on the mark scheme are designed to be awarded. Examiners should always award full marks if deserved, i.e. if the answer matches the mark scheme. Examiners should also be prepared to award zero marks if the candidate's response is not worthy of credit according to the mark scheme.
- Where some judgement is required, mark schemes will provide the principles by which marks will be awarded and exemplification may be limited.
- When examiners are in doubt regarding the application of the mark scheme to a candidate's response, the team leader must be consulted.
- Crossed out work should be marked UNLESS the candidate has replaced it with an alternative response.

Samsung sells the popular Galaxy Z Flip3 phone and may have a larger market share of this niche segment</li> <li>• There is the possibility of charging premium prices in a niche market. Samsung’s selling price for the ZFlip3 of \$1 000 may increase the profitability of the business</li> <li>• The folding phone has a USP which helps differentiate it from other products. This may enhance Samsung’s reputation and recognition</li> <li>• However, the sales volume of folding phones is a small percentage of the smartphone market. This may lead to higher unit costs and lower profit margins on the folding phones</li> <li>• Niche businesses can be risky as they are more vulnerable to market change. Changes in fashions and trends may result in declining sales</li> <li>• Premium prices charged for niche products are impacted by factors such as changes to the economy. If there is a downturn in the economy customers may choose cheaper substitutes. This may lead to a decrease in demand for businesses selling folding phones</li> </ul>

<b>Level</b>	<b>Mark</b>	<b>Descriptor</b>
	0	No rewardable material.
<b>Level 1</b>	1-2	Isolated elements of knowledge and understanding – recall based. Weak or no relevant application to business examples. Generic assertions may be presented.
<b>Level 2</b>	3-5	Accurate knowledge and understanding. Applied accurately to the business and its context. Chains of reasoning are presented, showing cause(s) and/or effect(s) but may be assertions or incomplete. An attempt at an assessment is presented that is unbalanced and unlikely to show the significance of competing arguments.
<b>Level 3</b>	6-8	Accurate and thorough knowledge and understanding, supported throughout by relevant and effective use of the business behaviour/context. Logical chains of reasoning, showing cause(s) and/or effect(s). Assessment is balanced, well contextualised, using quantitative and/or qualitative information, and shows an awareness of competing arguments/factors.

<b>Question</b>	Assess the importance for Realme of increasing its market share in the smartphone market  <b>Indicative content</b>
1(e)	<p><b>Indicative content guidance</b> Answers must be credited by using the level descriptors (below) in line with the general marking guidance. The indicative content below exemplifies some of the points that candidates may make but this does not imply that any of these must be included. Other relevant points must also be credited.</p> <p>Quantitative skills assessed:</p> <p><b>QS9:</b> Interpret, apply and analyse information in written, graphical and numerical forms</p> <p><b>Knowledge, Application, Analysis, Evaluation – indicative content</b></p> <ul style="list-style-type: none"> <li>• Market share is the percentage of an industry/market's total sales earned by a particular company over a specified time period</li> <li>• Increasing global market share from 6% is important to Realme because it is a measure of the consumers' preference over other brands such as Apple and Samsung. Increased market share is likely to mean more sales/profit for Realme</li> <li>• Realme's market share is an indicator of how well it is performing in relation to its competitors. An increase in its share will attract new customers who may become loyal to its business</li> <li>• Higher market share may give Realme a competitive advantage. Companies with higher market share have increased buying power and may benefit from economies of scale which may allow them to possibly reduce its prices/or increase profitability</li> <li>• However, it may be very difficult and unrealistic to take market share from leaders such as Apple and Samsung who have been established in the market for many years, unlike Realme that was only founded in 2018</li> <li>• Realme may have to spend considerably more than established brands in order to compete for market share. This could increase its costs and reduce its profitability</li> <li>• Other objectives may be more important to Realme such as profit maximisation or the innovation of its phones</li> <li>• It depends on the growth of the global smartphone market as to whether Realme should pursue this objective</li> </ul>

This allowed the business to determine the potential success of its products</li> <li>• <i>Mr Cory's Cookies</i> were able to gather feedback from the local community and make changes to products such as the popular choc-chip cookies. This may have resulted in improvements in the taste and quality of the product</li> <li>• Trialling a product reduces the risk of a full-scale launch. Changes could be made to the marketing of the cookies before launching on a larger scale and so prevent costly mistakes</li> <li>• However, a disadvantage of test marketing is the cost which can be expensive and time consuming</li> <li>• Testing the new products in a limited area may delay the launch of the product which may mean losing first-mover advantages</li> <li>• Products that sell locally might not sell well in other geographical areas. <i>Mr Cory's Cookies</i> ran the risk that the findings from the test marketing in its local community were not representative of other groups of customers</li> </ul>

*Toyota* and make it more difficult to maintain its position in the motor industry

- There may be additional administrative work involved in setting up and running flexible working arrangements
- Overall, it depends if the business is able to manage the flexibility and fulfil its business needs. Flexible working may be more appropriate for employees working in offices rather than those working in car factories
