#### **Extract A Global coffee bean production**

In 2019 the supply of coffee beans was greater than the demand, resulting in a global coffee bean surplus of over 4 million bags. Coffee bean supply increased by 8% whereas demand increased by only 2%. Consequently, by May 2019, the global price of coffee beans fell to its lowest level in over 10 years.

The increase in global production was caused by developments in farming equipment and improved methods of production. Also, favourable weather conditions in major coffee-producing countries, such as Brazil, contributed to the global increase in production.

The fall in the global price of coffee beans caused serious problems for small coffee growers in Central America and Africa. These farmers made large losses and many reached their short-run shutdown point. Some farmers have switched to the production of lower-risk crops.

## **Extract B Coffee shop chain growth**

Coffee is the second most popular drink in the world and the demand for it is increasing steadily. Globally two billion cups of coffee are consumed every day. The revenue of coffee shop chains globally is projected to reach \$237.6 billion by 2025.

Starbucks is the largest coffee shop chain worldwide. In 2019 Starbucks' revenue increased by 7.24%. Its profits also increased by 7.11% to \$17.98 billion. The company had over 27 000 stores worldwide, with many new shops opening in China.

In the USA it is difficult for a new firm to enter the coffee shop market because there are already a number of well-known firms. These include Starbucks, Tim Hortons, Dunkin' Donuts, Dutch Bros Coffee and Peet's Coffee. The firms compete using special offers, large advertising budgets and loyalty schemes. More recently, these firms have been using higher quality coffee beans and cold coffee drinks to attract younger coffee drinkers. They have also been investing heavily in developing mobile phone apps and online ordering systems to increase brand loyalty and market shares. Industry leaders believe that social media advertising is the most effective form of marketing for coffee shops.

However, there are still a large number of successful, small independent coffee shops in the USA. These are often very different to the larger firms, offering alternative drinks and food options. They are also located in out-of-town-centres and aim to attract a different type of consumer.
