## General Marking Guidance

- All candidates must receive the same treatment. Examiners must mark the first candidate in exactly the same way as they mark the last.
- Mark schemes should be applied positively. Candidates must be rewarded for what they have shown they can do rather than penalised for omissions.
- Examiners should mark according to the mark scheme not according to their perception of where the grade boundaries may lie.
- There is no ceiling on achievement. All marks on the mark scheme should be used appropriately.
- All the marks on the mark scheme are designed to be awarded. Examiners should always award full marks if deserved, i.e. if the answer matches the mark scheme. Examiners should also be prepared to award zero marks if the candidate's response is not worthy of credit according to the mark scheme.
- Where some judgement is required, mark schemes will provide the principles by which marks will be awarded and exemplification may be limited.
- When examiners are in doubt regarding the application of the mark scheme to a candidate's response, the team leader must be consulted.
- Crossed out work should be marked UNLESS the candidate has replaced it with an alternative response.

**Performance Grades report**

The screenshot shows a report design tool interface. At the top, there's a 'report' tab and a page number '1'. Below that, the report structure is defined with sections: Report Header, Page Header, School Header, Detail, and School Footer. The report content is previewed below, showing a title 'Performance Grades by School and Job' centered. The main content is grouped by school, with three schools listed: Edgewater Academy, River Valley Technical School, and Southview Secondary School. Each school has a table with columns for Job, Best Grade, and Worst Grade. The 'Worst Grade' column in the detail section and the 'Best Grade 1' footer are highlighted with orange boxes. The footer contains the formula: `= "Best Grade " & Min([BestGrade])`.
