Paper 1: Written Pa	per	
Wednesday 17 May 2017 - Time: 1 hour 30 minutes	- Morning	Paper Reference 4ITO/01
You do not need any other m	aterials.	Total Marks

Instructions

- Use **black** ink or ball-point pen.
- **Fill in the boxes** at the top of this page with your name, centre number and candidate number.
- Answer **all** questions.
- Answer the questions in the spaces provided
 - there may be more space than you need.

Information

- The total mark for this paper is 100.
- The marks for **each** question are shown in brackets
 - use this as a guide as to how much time to spend on each question.

Advice

- Read each question carefully before you start to answer it.
- Try to answer every question.
- Check your answers if you have time at the end.

Section A

Answer ALL questions.

All questions must be answered with a cross in a box \boxtimes . If you change your mind about an answer, put a line through the box \boxtimes and then mark your new answer with a cross \boxtimes .

- **1** A tracker ball is a type of:
 - A input device
 - B processing device
 - C output device
 - **D** storage device

(Total for Question 1 = 1 mark)

- 2 The most appropriate type of software to use for calculations is:
 - A word processing
 - **B** spreadsheet
 - C presentation
 - D audio editing

(Total for Question 2 = 1 mark)

- **3** Which **one** of these is a data input device?
 - A ROM
 - **B** WAN
 - C OMR
 - ☑ D VPN

(Total for Question 3 = 1 mark)

- 4 Which **one** of these is needed for internet access?
 - A OCR
 - B PIN

 - ☑ D ISP

(Total for Question 4 = 1 mark)

	Whi	ch o i	ne of these uses an optical method of data storage?

	X	A	A private network, which uses internet protocols, accessible by all visitors to an organisation's website
	X	В	A public network, which uses internet protocols, accessible by all visitors to an organisation's website
	X	C	A private network, which uses internet protocols, accessible by employees of an organisation
	X	D	A private network, which does not use internet protocols, accessible by employees of an organisation
			(Total for Question 15 = 1 mark)

16 A company uses a database to store staff details.

The manager wants a list of accountants and engineers who earn at least £40,000.

Which **one** of these would produce the required list?

- A JOB = "accountant" AND JOB = "engineer" AND SALARY >= £40,000
- **B** JOB = "accountant" OR JOB = "engineer" AND SALARY > £40,000
- ☑ **C** JOB = "accountant" AND JOB = "engineer" AND SALARY < £40,000
- **D** JOB = "accountant" OR JOB = "engineer" AND SALARY >= £40,000

(Total for Question 16 = 1 mark)

TOTAL FOR SECTION A = 16 MARKS

SECTION B

Answer ALL questions. Write your answers in the spaces provided.

17 (a) Amanda has a PC.

The table shows a list of components that form part of Amanda's PC system.

For each component put a cross in the correct box to indicate whether the component is used for input, output or storage.

(6)

	Input	Output	Storage
Speaker	×	×	×
Mouse	×	×	×
Flash memory	×	×	×
Webcam	×	×	×
DVD	×	×	×
Data projector	×	×	\boxtimes

(b) Amanda stores photographs on her PC.

Figure 1 shows a screenshot of a part of her PC's directory.

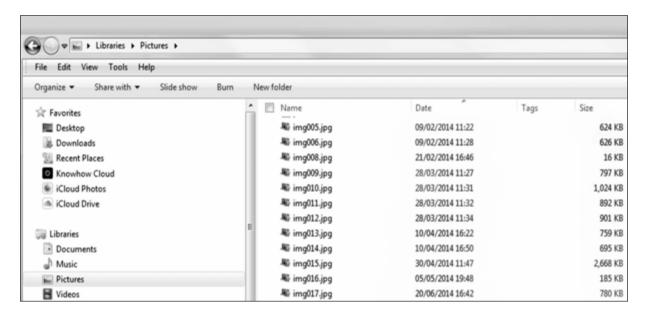

Figure 1

(i) The size of img005.jpg is given as 624 KB. State what is meant by the term KB.

(1)

(ii) Amanda often has difficulty finding a specific photograph.

Identify **two** methods Amanda could use to make it easier to find a file.

(2)

2			

(iii) Amanda uses image editing software to edit a photograph. She then inserts the photograph into a document using word processing software.Image editing and word processing are both examples of a type of software.	
Give the name for this type of software.	(1)
(iv) Name one other type of software that must be installed on the PC to allow the image editing and word processing software to run.	(1)
(v) The PC has a high resolution monitor.	
Identify one other item of hardware that must be present in the PC to display the photograph on the monitor.	(1)
(vi) Amanda uses a wireless printer with her PC.	
Identify two wireless connection methods that can be used to send photographs from a PC to a wireless printer.	(2)
(Total for Question 17 = 14 m	arks)

Thorns	sville College has a cafe that provides meals for students.	
The ca	fe struggles to serve all the students in the one-hour lunch break.	
	•	
(i)	He has decided to produce a computer model to help him solve the problem.	
	Name the most appropriate type of software that would be used to produce the computer model.	
		(1)
(ii)	Variables are needed as inputs to the model.	
	One variable could be the number of checkouts that are open.	
	Identify two other variables that could be used as inputs to the model.	
		(2)
	Variable 1	
	Variable 2	
(iii)	Identify two outputs that could be produced by the model.	
		(2)
	Output 1	
	Output 2	
	The ca (a) Joe stu (i)	Name the most appropriate type of software that would be used to produce the computer model. (ii) Variables are needed as inputs to the model. One variable could be the number of checkouts that are open. Identify two other variables that could be used as inputs to the model. Variable 1 Variable 2 (iii) Identify two outputs that could be produced by the model. Output 1

(iv) Joe uses the software to display the outputs from the model. The software can display the outputs as a table. Identify one other way the software could display the outputs.	(1)
(v) Give two benefits of using a computer model to solve the problem. Benefit 1	(2)
Benefit 2	
(vi) Give two drawbacks of using a computer model to solve the problem. Drawback 1	(2)
Drawback 2	
(vii) Describe how Joe could show that his model gives realistic outputs.	(2)

(b) Students pay for their meals using pre-paid cards.

Electronic data is stored on the cards using a magnetic stripe.

Thornsville College Cafe

Payment card

(i) Give **one other** method of storing electronic data on a card.

(1)

(ii) Give **two** benefits to the students of using pre-paid cards to pay for their meals.

(2)

(Total for Question 18 = 15 marks)

9 P	T Agency provides private tutors for students.	
(2	a) There is a network of computers within the administration office.	
	The network is made up of a number of workstations connected to a server.	
	(i) Name this type of network.	
		(1)
	(ii) Give one way in which a workstation can be identified on the network.	(1)
		(1)
	(iii) The server manages data security on the network.	
	Identify three ways in which data security can be managed on the network.	(3)
	(iv) One benefit to staff using the network is that data security is managed for them	•
	Give three other benefits to staff of using the network.	(2)
		(3)

- **20** PRL Training provides courses for industry.
 - (a) Trainers deliver the content for face-to-face courses using presentation software.

 Trainers and learners are given printouts to use during the courses.

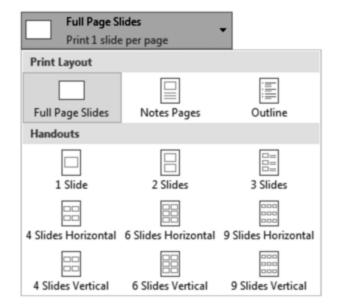

Figure 2

Figure 2 shows a screenshot of the formats that could be used for the printouts. Identify the most appropriate formats to use for the trainers and the learners.

For each format give a reason for your choice.

Format for trainers

Reason

Format for learners

Reason

	Identify two advantages to learners of courses delivered online rather than face-to-face.	
		(2)
	Issues may arise for learners using technology to access online courses.	
	Identify two practical issues for learners.	(2)
(iii)	Explain why the learning experience may be better on a course delivered	
	face-to-face rather than online.	(2)
